TASK
 GLOVES

At Task Gloves, we believe there is a better way to do safety. A more comprehensive, reliable and innovative way where our customers depend on us to administer exceptional results. Our team is passionate about the industry, and our mission is to deliver high-quality products, coupled with care that is unrehearsed and valued across the board.

We focus on problem solving and take the time to listen to each customer's needs for every phase of their job. By doing this, we not only develop relationships that embody trust, but also deliver proven results.

Our products are perfectly engineered and delivered from one of our two distribution sites located in the City of Industry, CA., and Louisville, KY. With our main office located in the City of Industry, we ensure that each glove and protective piece is shipped with impeccable craftsmanship, comfort, durability, and style for the perfect fit.

With hand safety in high demand, we know how important it is to continuously stay in the front line with development and innovation, as well as education, which is why we continuously offer our staff and customers the knowledge needed to select the correct glove for each task. Our products range from traditional work gloves to advanced coated, cut-resistant, cold/heat resistant, textile, chemical, disposable, impact-resistant and mechanic. We also offer protective wear such as sleeves, rainwear, disposable apparel, and cut resistant sweaters. Additionally, we have direct import, private label, and vend packing solutions available, just ask us how.

AMERICAN NATIONAL STANDARD FOR HAND PROTECTION CLASSIFICATION

ANSI/ISEA 105-2016 addresses the classification and testing of hand protection for specific performance properties related to chemical and industrial applications. This standard provides performance ranges related to mechanical protection (cut-resistance, puncture resistance and abrasion resistance), chemical protection, (permeation resistance, degradation), and other performance characteristics such as ignition resistance and vibration reductions based on standardized test methods.

ASTM F2992-15 TDM Test (grams)	A1	A2	A3	A4	A5	A6	A7	A8	A9
	Low Cut (200-499g)	Low/Med Cut (500-999g)	Low/Med Cut (1000-1499g)	Medium Cut (1500-2199g)	Med/High Cut (2200-2999g)	High Cut (3000-3999g)	High Cut (4000-4999g)	High Cut (5000-5999g)	High Cut (6000+g)

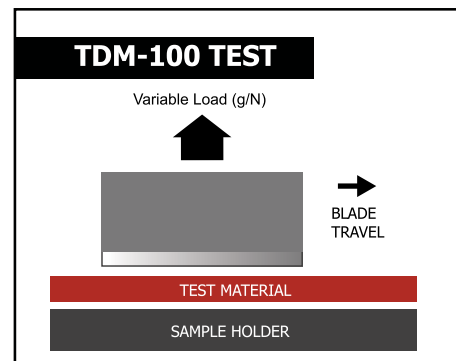

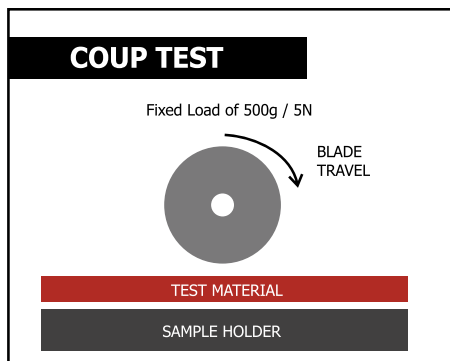

EUROPEAN EN388 (CE)

EN388 standards reports two cut levels, which are based on two different methods: Coup Test and ISO 13997 (TDM-100).

The first cut level is based on the Coup Test. The Coup Test uses a circular blade which travels back and forth under 500 grams of weight until cut is made through sample tested. Cut levels are reported on a 1-5 scale.

The ISO 13997 is the second test EN388 standards reports. The incorporation of the ISO 13997 is due to the Coup Test inconsistencies with high cut resistant materials. The ISO 13997 uses the TDM-100 test method which uses a straight razor blade under variable weight to measure cut resistance. As each cut is made, the blade is changed and weight is added resulting in more accurate readings. Readings are measured in newtons and reported in levels A-F (2-30 newtons).

EN388 (CE)		 1 2 3 4 X X
	Rating

COMMON COATINGS

Seamless coated dipped gloves have grown in popularity and has become an industry standard. These gloves come in a variety of coatings to provide added protection, dexterity, and enhanced grip ideal for handling small parts, automotive work, metal stamping and construction. Each of these coatings are advantageous for different reasons and there are several common types of coatings used on these seamless knit gloves:

Latex

Latex delivers a high resistance to snagging, puncture, and abrasion. This soft and flexible coating delivers excellent grip in wet and dry applications that do not include oil.

Crinkle Latex

Latex coating with an added rough textured, wrinkled surface finish designed to channel fluids away, allowing for better contact for superior grip on wet and dry conditions.

Polyurethane

PU allows for an incredibly tactile grip in dry and some oily conditions. It features an excellent balance of durability, abrasion resistance, and tensile strength while remaining soft and comfortable to wear.

Flat Nitrile

Made of synthetic rubber, nitrile offers excellent puncture, tear and abrasion resistance. Flexible grip on dry and oily conditions. The closed cell composition of flat nitrile makes it impermeable to liquids, preventing fluids from coming into contact with the skin.

Sandy Nitrile

This unique sandy-etched texture is known for its high abrasion resistance and provides excellent grip on dry, wet, and oily conditions. It is also more elastic and form fitting compared to other nitrile coatings.

Foam Nitrile

This micro texture is breathable, flexible and porous. It acts like a sponge designed to channel fluids away from the surface, helping to improve grip in oily conditions. However, this open-pore structure can become saturated when subjected to heavy oils and liquids, thus making it more suited to dry and light oil environments.

Micro-Foam Nitrile

The unique air infused foam nitrile is engineered for maximum grip on dry, wet, and oily conditions. This flexible, thin, porous coating offers ultimate breathability, dexterity and comfort.

RevoTek®

Our revolutionary coating that offers anti-slip handling for precision grip in dry and oily environments. This multilayer design ensures breathability without compromising grip performance.

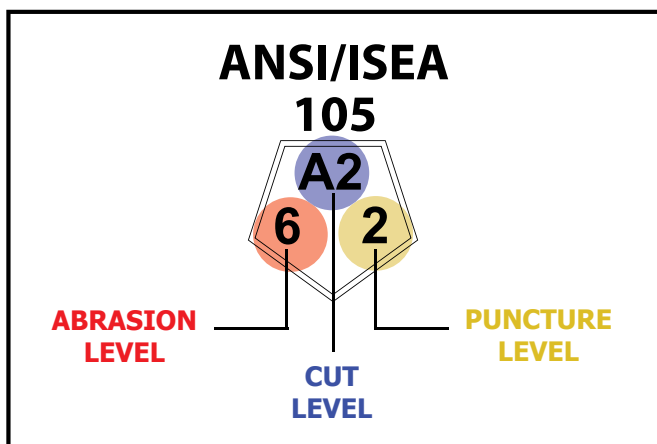

CUT RESISTANT

CUTMAN® CUT RESISTANT

With the rise of popularity for cut protection in the industry, cut resistant gloves have continued to evolve to provide higher cut protection while increasing dexterity, tactile sensitivity, and comfort. Our cut resistant gloves are developed with the latest advanced technology, manufactured in ISO certified facilities and complying to the current highest safety standards in the market today. Tailored to meet today's rising demand in cut protection, you can find the right pair from our section range of cut resistant gloves for your task specific needs.

CUT RESISTANT

TURNBULL® YARN

Turnbull® engineered yarn technology brings a high performance cut resistant glove without compromising dexterity and comfort. With no added fiber reinforcements like glass or steel to increase cut protection, our Turnbull® yarn provides an unmatched level of comfort, a cut resistant glove that won't irritate during a full work shift, even in the toughest and most aggressive working environment.

TEXTILE

TEXTILE GLOVES

Whether it's landscaping or warehouse work, our textile gloves are perfect for everyday use. Cotton and fabric gloves are cool and absorbent to give you long lasting comfort. Hot mill and terry cloth gloves provide a thicker layer to help protect against high-level of heat, while cotton and jersey gloves keep the hands clean and protect them against general application abrasions.

LEATHER

IRONBARK® LEATHER GLOVES

Known as the grandfather of gloves, the leather glove is the most traditional glove in the market. Leather naturally resists sparks and protects from moderate heat, making it the go-to glove in the welding market. Also known for its resiliency against abrasions, and protection from heat and cold elements, leather continues to be the ideal choice for work gloves.

- Premium grain goatskin driver
- HDPE lined
- Shirred elastic back
- Keystone thumb

SIZES AVAILABLE:

S-2XL

PROP 65

IB1400T

- Premium grain goatskin driver
- HDPE and terry acrylic blended liner
- Shirred elastic back
- Keystone thumb

SIZES AVAILABLE:

S-3XL

WINTER PROP 65

IB1420P

- Quality grade top grain goatskin leather driver
- Shirred elastic back
- Keystone thumb

SIZES AVAILABLE:

S-2XL

PROP 65

IB2010F

- Quality grade top grain cowhide leather driver
- Red fleece lining
- Shirred elastic back
- Keystone thumb

SIZES AVAILABLE:

S-2XL

WINTER PROP 65

IB4527F

- Premium grade top grain pigskin leather driver
- Reinforced split leather double palm
- Kevlar® stitching
- Knit wrist construction
- Wing thumb
- Fleece Lined
- EVA foam back of hand padding

SIZES AVAILABLE:

S-2XL

IB5020F

- Quality grade top grain pigskin
- Red fleece lining
- Shirred elastic back
- Keystone thumb

SIZES AVAILABLE:

S-2XL

IB3200

- Premium top grain cowhide leather palm
- Leather knuckle strap
- 2 1/2" rubberized safety cuff
- Cotton lined
- Wing thumb
- Gunn cut design

SIZES AVAILABLE:

S-XL

IB3222

- Select shoulder split cowhide leather palm
- Leather knuckle strap
- 2 1/2" rubberized safety cuff
- Cotton lined
- Wing thumb
- Gunn cut design

SIZES AVAILABLE:

S-2XL

IB5323WC

- Regular shoulder split cowhide leather palm
- Reinforced palm patch
- Leather knuckle strap
- White canvas back
- 2 1/2" canvas safety cuff
- Cotton lined
- Wing thumb
- Gunn cut design

SIZES AVAILABLE:

Men's Large

APPLICATIONS:

Construction | Material handling | Utility Work | Masonry | General Maintenance | Waste Management

IB5343

- Economy shoulder split cowhide leather palm
- Reinforced palm patch
- Leather knuckle strap
- 2 1/2" starched safety cuff
- Cotton lined
- Wing thumb
- Gunn cut design

SIZES AVAILABLE:

Men's Large

IB3414

- Premium shoulder split cowhide leather palm
- Full leather back
- 4 1/2" rubberized safety cuff
- Cotton lined
- Wing thumb
- Gunn cut design

S-2XL

APPLICATIONS:

Welding | Construction | Steel Work | Metal Forging

HIGH PERFORMANCE

ROCKDARE® MECHANICS GLOVES

The versatile design of these ergonomic gloves creates an unmatched feel for functionality and range. By combining the perfect blend of synthetic fibers with exceptional craftsmanship, our mechanic line of gloves are perfect for gripping tools and oily environments without losing dexterity or comfort.

MT1001B

- Premium black synthetic leather palm
- Padded contoured palm
- Spandex back
- Shirred elastic slip-on cuff

SIZES AVAILABLE:

S-2XL

MT1002

- Premium black synthetic leather palm
- Blue spandex with mesh inlay back
- Elastic wrist with hook and loop closure

SIZES AVAILABLE:

S-XL

MT1003

- Premium black synthetic leather palm
- Anti-vibration padded palm with silicone coated thumb, index and middle fingers
- Spandex with neoprene knuckle back
- Elastic wrist with hook and loop closure

SIZES AVAILABLE:

S-3XL

MT1005TRI

- Premium synthetic leather palm
- Comes in tri-packs of black, red & gray
- Spandex back
- Shirred elastic slip-on cuff

SIZES AVAILABLE:

S-XL

MT1004

- Premium synthetic leather palm
- Exposed middle, index and thumb fingertips
- Reinforcement between thumb and forefinger
- Anti-vibration rubber padded palms
- Thermoplastic rubber knuckles
- Spandex back
- Hook and loop closure

SIZES AVAILABLE:

M-XL

MT2001

- Premium black synthetic leather double palm
- Reinforced thumb saddle
- 3M Thinsulate® lined with inner waterproof barrier
- Spandex back
- Elastic wrist with hook and loop closure

SIZES AVAILABLE:

S-XL

APPLICATIONS:

Automotive | Construction | Warehouse | Landscaping | Assembly | General Maintenance

HIGH PERFORMANCE

ROCKDARE® IMPACT GLOVES

Heavy duty jobs require heavy duty protection. Impact gloves provide a layer of shock absorbing material, which protects the fingers and back of the hand from crushing and pinch point injuries. Designed to combat hand and finger injuries, thermal plastic rubber (TPR) overlays are strategically placed to protect the back of the hand and fingers often exposed to these potential injuries. From mechanic style construction, to seamless knit, to cut resistance and cold protection, you can find the right impact protection for your line of work with our impact gloves.

BT2013NPT

- 13 Gauge high-density polyethylene shell
- Black sandy nitrile palm coated
- EVA padded palm
- Thermoplastic rubber overlays on the back of hand and fingers
- Gray nitrile reinforced thumb saddle
- Hook and loop closure

SIZES AVAILABLE:

S-2XL

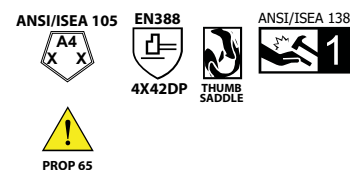

BT2014PUT

- 13 Gauge high-density polyethylene fiber shell
- Polyurethane palm coated
- EVA padded palm
- Thermoplastic rubber overlays on back of hand and fingers
- Black PVC reinforced thumb saddle
- Hook and loop closure

SIZES AVAILABLE:

S-2XL

VS2260X

- 15 Gauge light weight seamless nylon knit shell
- Black micro-foam nitrile palm coated
- Thermoplastic rubber overlays on back of hand, fingers and thumb

SIZES AVAILABLE:

S-2XL

RD1012

- Cotton corded palm
- Thermoplastic rubber overlays on fingers, thumb and back of hand
- Hi-viz yellow spandex back
- Neoprene slip-on cuff with pull tab and ID badge

SIZES AVAILABLE:

S-3XL

APPLICATIONS:

Oil & Gas | Material Handling | Mining | Automotive | Demolition | Construction

RD1019

- 13 Gauge high-density polyethylene fiber shell
- Sandy nitrile coated palm
- Thermoplastic rubber overlays on fingers, thumb and back of hand

SIZES AVAILABLE:

S-3XL

RD1020

- Synthetic leather palm
- SBR anti-vibration palm padding
- Thermoplastic rubber overlays on the back of the hand and fingers
- Touchscreen compatible index finger and thumb
- Hook and loop wrist closure

SIZES AVAILABLE:

S-3XL

IMPACT PERFORMANCE

AMERICAN NATIONAL STANDARD PERFORMANCE AND CLASSIFICATION FOR IMPACT RESISTANCE HAND PROTECTION

ANSI/ISEA 138 2019 covers impact resistance in work gloves to better classify the impact resistance of gloves and help safety professionals make better-informed decisions about glove selection. This standard establishes the minimum performance, classification, and labeling requirements for material protecting the fingers and knuckles from impact.

IMPACT PERFORMANCE LEVEL

Performance Level	Mean Transmitted Force (MTF)	Increasing Protection
ANSI/ISEA 138 3	≤ 4kN	
ANSI/ISEA 138 2	≤ 6.5kN	
ANSI/ISEA 138 1	≤ 9kN	

UNDERSTANDING ANSI/ISEA 138-2019 TESTING

ANSI/ISEA 138-2019 defines three levels of impact protection. Each level is determined on how effectively each glove can disperse impactful force applied during the testing. The higher the glove rating, the better the protection. Testing is performed by dropping a 2.5-kilogram mass onto each impact areas of the glove, with an impact energy of 5 joules. This process is repeated ten times on the fingers and eight times on the knuckles. The recorded forced is transferred in kilonewtons (kN).

RD1021

- 15 Gauge high-density polyethylene fiber shell
- Gray polyurethane coated palm
- Reinforced thumb saddle
- Thermoplastic rubber overlays on the back of the hand and fingers

SIZES AVAILABLE:

XS-2XL

PROP 65

RD1022

- 15 Gauge high-density polyethylene fiber shell
- Black RevoTek® coated palm
- Reinforced thumb saddle
- Thermoplastic rubber overlays on the back of the hand and fingers

SIZES AVAILABLE:

S-2XL

RD2010

- Premium grain goatskin driver
- High-density polyethylene fiber shell lined
- Shirred elastic back
- Keystone thumb
- Thermoplastic rubber overlays on the back of the hand and fingers

SIZES AVAILABLE:

XS-3XL

RD2010T

- Premium grain goatskin driver
- High-density polyethylene and terry acrylic blended liner
- Shirred elastic back
- Keystone thumb
- Thermoplastic rubber overlays on the back of the hand and fingers

CHEMICAL RESISTANT

CHEM101® CHEMICAL RESISTANT

Different chemical jobs require a tailored glove to match. From sanitation, automotive and more, chemical resistant gloves protect from corrosive chemicals, oils and grease. When selecting a chemical glove for your application, identify the potential chemical hazard to help determine which glove material is best suited to protect against them.

CHEMICAL RESISTANT CHART

The following chart is intended to provide general information and to be used for reference purpose only. It was designed to get you started in the selection process. User must proceed with caution when handling these materials. We recommend on-site testing of all glove prior to actual use of the product.

Warning: Glove materials do not provide unlimited protection against all chemicals. It is up to the user's sole discretion to select appropriate safety gloves for the occasion. The manufacturer, distributor, and sales representatives do not accept responsibility for the user's choice of product against any particular risk.

DISPOSABLE

ROCKDARE® DISPOSABLE GLOVES

Whether it's application based, budget or both, disposable gloves are a cost-effective solution for incidental contact, protecting from unknown hazards and preventing cross contamination. These disposable gloves are ambidextrous and come in a variety of textures and materials such as latex, nitrile, or vinyl. Disposable gloves are suitable for everyday general-purpose applications, from food preparation to automotive and sanitation.

**DS5003**

- 3.5 mil blue nitrile
- Textured finish
- Powder-free
- Ambidextrous
- 100 gloves/box
